

Alignment Principles

Basic setting instructions

Step 1 --- Check steering trunion is central

Use R3 steering alignment
restraint to hold wheel in position

Step 2 --- Fit Eagle eye

You can fit Eagle eye with or without wheels in position

Step 3 --- Level the bubbles and switch on both units

Step 4 --- Adjust track rods for toe on each side

Step 5 --- Adjust for Camber on both sides

Step 6 --- Re-check all settings including the bubbles

Step 7 --- Remove Eagle eye and refit wheels.

Tighten all fittings and remove steering wheel restraint if used.
